  - c. \_\_\_\_\_ A slightly worse alternative to educational impact fees for new homes.
  - d.  A significantly worse alternative to educational impact fees for new homes.

Use this area to include other information you want voters to consider:

Currently Kearns is in desperate need for commercial tax base. We are landlocked and what property we do have is being developed into housing developments that are far from affordable. Kearns is the highest density city in SLCO currently and has often been referenced as an example to not duplicate when developing. Property taxes are continuously going up on homes and driving people to decide to sell. Our community must travel distances to get to their jobs in order to pay their bills. New businesses bring jobs. Every decision that is made by the council is imperative to the success of Kearns Township. It must be calculated and must take all the above factors into consideration. I want our community to succeed. I want to increase our tax base and keep the dialogue open with developers and businesses to invest in our community. This is how we will succeed. We need to keep the momentum going that we have gained this past 3 years.
