 - d. _____ A significantly worse alternative to educational impact fees for new homes.
 - e. No opinion currently need to look at the issue in more detail.

Use this area to include other information you want voters to consider: Several questions depend on how certain words are defined by the individual, but my overall philosophy is keep govt minimal and out of people's live except wher the overall good is obtained such as public safety, infrastructure etc. Too often govt seeks solutions for problems which don't exist.

I'm running to ensure public safety, bring transparency to govt., reduce spending and protect neighborhood integrity.

My Masters in Public Administration and experience as a United States Air Force Officer and the associated training and discipline prepared for the job.
